Reasons for Allowance

The following is an examiner's statement of reasons for allowance: applicant's arguments with respect to the prior art rejections are deemed persuasive, particularly in light of the amendments to claims 12 and 15. First, it is noted that applicant has perfected the claim for priority and the Ellman et al (6,652,514) reference no longer applies as prior art. With regard to the Newton ('927) and German publication references, applicant's arguments that these references fail to disclose that the first signal coder and the second signal coder are also assigned to a third switch are deemed persuasive. In both Newton and the German publication, the third switch is connected via a direct line to a control signal line and therefore are not provided with the first and second signal coders as set forth in the claims. There is no control signal line connected to first, second and third switches as now set forth in the independent claims 12 and 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Peffley whose telephone number is (571) 272-4770. The examiner can normally be reached on Mon-Fri from 6am-3pm.
